Overview

Degree	Master of Science
Teaching language	<ul style="list-style-type: none">English
Languages	Courses are held in English (100%).
Programme duration	4 semesters
Beginning	Winter semester
Application deadline	<p>Foreign applicants not applying for a scholarship: The application deadline for self-paying candidates is 31 March for the coming winter semester at uni-assist (http://www.uni-assist.de/).</p> <p>German applicants: At the Office of Student Services of TH Köln: 10 June</p> <p>Application for a DAAD scholarship: Additionally, with one professional recommendation letter, at ITT, TH Köln (University of Applied Sciences): 30 September (one year before the intended start of the programme)</p> <p>Please also check the "How to Apply" section of the individual TH Köln programme websites: http://www.th-koeln.de/programs.</p>
Tuition fees per semester in EUR	None
Combined Master's degree / PhD programme	No
Joint degree / double degree programme	No
Description/content	<p>The MSc programme in Renewable Energy Management focuses on renewable energy systems and energy efficiency and their potential for tropical and subtropical societies. With a deliberate energy system perspective, the focal area enables the students to analyse technological and economic potentials of the technology choices as well as social and environmental repercussions in the natural environment of the tropics and subtropics and in the socio-economic context of countries of low and medium development. REM students get acquainted with renewable energy</p>

management-related topics such as bioenergy and geothermal energy, solar energy, wind energy and hydropower, energy management, and more. It is possible to add elective modules from the MSc programmes in Integrated Water Resource Management and Natural Resources Management.

Course Details

Course organisation	<p>The Master's programme starts in the winter semester of each academic year. It consists of modules, which are usually block-structured. During the first three semesters, students attend lectures and seminars; the fourth semester is devoted to writing the Master's thesis, normally in conjunction with a period abroad. The standard period of study includes the examination and research semester.</p> <p>The programme is structured in the following parts:</p> <ul style="list-style-type: none"> • First semester: general modules (e.g. environmental economics, project work), specialisation modules (e.g. energy resources, renewable thermal energy) and tools (e.g. GIS, statistics) • Second and third semesters: general modules (e.g. international cooperation, project management) and specialisation modules from the area "Renewable Energy Management"; in addition, elective modules from the areas "Natural Resources Management", "Integrated Water Management" and "Methods and Tools" can be chosen • Fourth semester: Master's thesis
International elements	<ul style="list-style-type: none"> • International guest lecturers • Specialist literature in other languages • Training in intercultural skills • Study trips • Courses are led with foreign partners • Projects with partners in Germany and abroad • Content-related regional focus • Integrated study abroad unit(s)
Integrated study abroad unit(s)	Student and lecturer exchange with partner universities.
Special promotion / funding of the programme	<ul style="list-style-type: none"> • DAAD development-related postgraduate course
Course-specific, integrated German language courses	No
Course-specific, integrated English language courses	No

Costs / Funding

Tuition fees per semester in EUR	None
Semester contribution	Approx. 320 EUR per semester

Please check the following page: https://www.th-koeln.de/en/academics/fees_5908.php

The semester ticket for public transport for the federal state of North Rhine-Westphalia is included in the semester fee.

Costs of living

The cost of living for your stay largely depends on your personal needs. When planning your stay, you should calculate monthly costs of approx. 800 to 1,000 EUR.

Funding opportunities within the university

Yes

Description of the above-mentioned funding opportunities within the university

International students are eligible to apply for the "Deutschlandstipendium". The scholarship holders receive approx. 300 EUR per month for the duration of one year.

Requirements / Registration

Academic admission requirements

For admission to the Master's programme in "Renewable Energy Management" (MSc), applicants are required to have successfully completed studies in the field of engineering or natural science (at least a Bachelor's or comparable degree). The following fields of study are eligible: engineering science, natural science, architecture, agriculture science, life science and earth science.

There is a set of minimum requirements that participants have to fulfil:

- Bachelor's degree with minimum grade of 3.0 (according to the German System)
- Proof of a relation to the management of renewable energies through the previous studies of minimum 15 ECTS
- Proof of English proficiency (see language requirements)

The following application documents are required:

- Letter of motivation (one page in English)
- Curriculum vitae (in tabular form)
- Scientific project / research proposal for the Master's thesis (two pages in English)
- Certified copies of academic certificates:
 - Certified copy of school leaving certificate
 - All university end-of-year exam certificates (with individual grades)
 - University diploma or degree certificate indicating the final grade(s)

Language requirements

- Certified proficiency in English – TOEFL iBT 79 points, IELTS band score 6.0 (academic), Cambridge First (FCE)
- The English proficiency test should not be older than five years.
- Foreign applicants applying for a DAAD scholarship: Basic German language skills are recommended.

Application deadline

Foreign applicants not applying for a scholarship:
The application deadline for self-paying candidates is 31 March for the coming winter semester at uni-assist (<http://www.uni-assist.de/>).

German applicants:
At the Office of Student Services of TH Köln: 10 June

Application for a DAAD scholarship:
Additionally, with one professional recommendation letter, at ITT, TH Köln (University of Applied Sciences): 30 September (one year before the intended start of the programme)

Please also check the "How to Apply" section of the individual TH Köln programme websites:
<http://www.th-koeln.de/programs>.

Submit application to

If you are a prospective international student, the way to apply is determined by your citizenship, your desired degree programme, and your previous academic qualifications.

Further information on how to apply: <https://www.th-koeln.de/internationalapplicants>

Services

Possibility of finding part-time employment

Taking on a part-time job while studying has lots of benefits. Students can earn some extra money and gain valuable professional experience, and they might even take a first step up on the career ladder. Gaining a first insight into the German corporate world is especially beneficial for international students.

Many students partially fund their studies at TH Köln by taking on a part-time job in or outside the university.

Accommodation

Being Germany's fourth largest city, Cologne is a highly attractive place to live. The increasing influx of people can make the search for adequate accommodation quite difficult. Dozens of apartment hunters often compete for one single apartment. This is why we strongly recommend that you start looking for a place to live as soon as possible.

Cologne's most convenient and economical housing option is often a student dormitory. A public student services association called "Kölner Studierendenwerk" (KSTW) operates 88 student dorms offering roughly 4,800 rooms. The seemingly large number of dorm rooms is misleading; as the dormitories are open to the roughly 90,000 students enrolled at all Cologne universities, they are in extremely high demand. Please be aware that TH Köln does not allocate the rooms in these dorms. Please apply directly to the KSTW: <https://www.kstw.de/wohnen>. You do not yet need a letter of admission in order to apply.

The fierce competition on the private housing market has resulted in above-market rents – particularly in proximity of the city centre. We therefore encourage you to be flexible. Try to look for apartments outside the centre or share an apartment – and the cost of rent – with other students.

MSc Renewable Energy
Management

ITT is an open-minded and multicultural place, providing adequate space and incentives for personal growth. International exchange and praxis-oriented work with fellow students from all over the world enriched my studies a lot, and the theoretical content had a personal touch. The programme equipped me with handy tools and methods in several regards, from principles and processes in natural science to economics, energy-related politics and development actions.

Technische Hochschule Köln – abbreviated as TH Köln – University of Applied Sciences – sees itself as a university of technology, arts, and

sciences. With its disciplinary and cultural diversity and openness, TH Köln's activities are aimed at cultural and technological breakthroughs of high societal relevance. Thus, TH Köln contributes substantially to resolving social challenges. As a community of faculty and students, we see ourselves as a learning organisation forging new paths. For instance, TH Köln is one of the pioneers in the field of development and formation of concepts for higher education didactics.

Our subject range includes the fields of applied natural sciences, architecture and construction, information and communication, computer science, engineering, culture and society, and social sciences as well as business studies. More than 100 degree programmes are offered as full-time programmes or, in some cases, as career-integrated or part-time programmes. As a place where research-based learning and academic education take place, the university nurtures prospective scholars through cooperative dissertations. Annually, about 6,500 students take up their studies at TH Köln. Overall, 27,000 students from about 120 different countries along with 440 professors and 2,000 staff members apply their potential.

Research mainly focuses on future-related issues, including climate change, energy supply, health, and food safety as well as demographic changes. While developing solution strategies for the most important questions of our time, researchers offer their professional expertise in interdisciplinary interaction. At the same time, they collaborate closely with local, national, and international cooperation partners, including 350 international institutions of higher education. The university offers its researchers an attractive sphere of activity. The quality seal "HR Excellence in Research" awarded by the European Commission certifies that TH Köln meets international standards in the field of human resources development.

TH Köln's campuses are located in Cologne, Gummersbach, and Leverkusen.

TH Köln

University location

Its metropolitan vibe, diverse student scene and a cityscape abounding with cultural and historical treasures make Cologne one of Europe's prime university cities. Cologne's origins date back to the Roman Empire more than 2,000 years ago. Today, Cologne is Germany's fourth largest city with a population of just over one million and has evolved as an economic and cultural metropolis at the heart of Europe. The city's characteristic landmark and source of pride for every inhabitant is without a doubt the magnificent Cologne Cathedral, locally known as the "Kölner Dom". Towering over the quaint Old Town of Cologne at 156 metres, this masterpiece of Gothic architecture is the world's third-highest cathedral and attracts around six million visitors a year, making it Germany's most popular tourist attraction. Visitors from all over the world are bound to feel at home immediately, as Cologne is a true melting pot of cultures. Close to one-fifth of its inhabitants have an international background. Cologne's economy is characterised by its amalgamation of different industries and trades. Home to the country's most influential television and radio stations, Cologne is unquestionably Germany's media capital and host to some of the continent's biggest trade fairs. Quite a few of the world's most renowned enterprises call the metropolitan region their home, in particular, corporations operating in the automobile industry, biotechnology and life sciences, chemicals and pharmaceuticals as well as commerce and banking.

Please note that TH Köln also has two remote campuses outside Cologne, which are located in the towns of Gummersbach and Leverkusen.

Gummersbach is a town with 50,000 inhabitants located 55 km east of Cologne, surrounded by a hilly landscape which is a recreational area for residents from Cologne and other cities nearby. The campus can be reached in a few minutes from Gummersbach train station. A train ride to Cologne, which is the largest city in the region, takes one hour and ten minutes and will be covered by the semester ticket, which is included in the semester fee. Students will be able to find affordable accommodation in Gummersbach and focus on their studies in the great environment of a modern campus.

The Leverkusen campus is located 15 km north of Cologne in the Neue Bahnstadt Opladen and was opened in 2022. It is close to the CHEMPARK in Leverkusen, which is one of the largest chemical parks in Europe. Global players from the chemical and pharmaceutical industry, such as Bayer and LANXESS, are located there. With 160,000 inhabitants, Leverkusen is a smaller industrial city that has plenty of opportunities for relaxation, thanks to its location in the foothills of the Bergisches Land region. In Leverkusen, you can find urban buzz and village-like tranquillity in close proximity. The campus can also be reached with TH Köln's semester ticket.
