Master's degree **2**

Sustainable Mobility Management (MBA) • Technische Universität Berlin • Berlin 2

Master's degree

Sustainable Mobility Management (MBA)

Technische Universität Berlin • Berlin

Overview

Degree	Master of Business Administration (MBA)
Teaching language	• English
Languages	English only
Programme duration	3 semesters
Beginning	Winter semester
Application deadline	30 April
Tuition fees per semester in EUR	6,600 EUR
Combined Master's degree / PhD programme	No
Joint degree / double degree programme	No
Description/content	Technische Universität Berlin offers a Master's course of study in Sustainable Mobility Management at the EUREF Campus in the centre of Berlin. The growing environmental impact of transport systems, as well as their energy voracity, require new approaches and new concepts. This MBA offers an integrative design across disciplines, addressing a range of different perspectives. The theory and practice-driven approach gives students both a conceptual understanding and the skills needed to tackle practical problems, covering the needs of strategy development, analysis and implementation, complex decision-making, and project management. The course targets transport engineers, transport and mobility experts, planners, architects, and sustainability project managers who want to gain in-depth, special knowledge in the field of sustainable mobility management.

Course Details

Course organisation	**First semester:** M01 Technology (9 ECTS) M02 Economics (6 ECTS) M03 Business (9 ECTS) M04 Law and Governance (6 ECTS) **Second semester:** M05 Management (12 ECTS) M06 Mobility Trends and Futures (6 ECTS) M07 Mobility Actors and Practices (6 ECTS) M08 Lecture Series (6 ECTS) **Third semester:** Elective I (6 ECTS) Elective II (6 ECTS) Thesis (18 ECTS) Excursions and company visits are part of the courses, and are adapted if necessary to an online format.
A Diploma supplement will be issued	Yes
International elements	• International guest lecturers • Courses are led with foreign partners • International comparisons and thematic reference to the international context
Integrated internships	There are no integrated internships, however, we highly recommend doing internships throughout the study programme.
Course-specific, integrated German language courses	No
Course-specific, integrated English language courses	No

Costs / Funding

Tuition fees per semester in EUR	6,600 EUR
Semester contribution	The semester contribution (enrolment fee) amounts to 307.54 EUR per semester and is not included in the tuition fees. It offers a semester ticket covering public transport in the Berlin metropolitan area (ABC zones).
Costs of living	In order to cover living expenses (room and board, health insurance, books, personal costs) for the study period in Berlin, we recommend that participants budget approx. 1,000 to 1,200 EUR per month.

Funding opportunities within the university	No

Requirements / Registration

Academic admission requirements	**Required application documents:** • First university degree (translation into English or German) • Proof of at least one year of work experience after the completion of first university degree, preferably in the relevant areas of transport and planning • Transcript of records (translation into English or German) • Tabular CV • Motivation letter in English (max. 1 page A4) • Proof of English language proficiency (details below) • Only if available: Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE)
Language requirements	Applicants must provide proof of their English skills at level B2 (or higher) of the Common European Framework of Reference for Languages (CEFR). This is not required if you graduated from a high school or university at which all classes were taught in English.
Application deadline	30 April
Submit application to	Application Sustainable Mobility Management

Services

Possibility of finding part-time employment	The Career Service at Technische Universität Berlin offers a wide range of services for students seeking employment during their studies in Berlin as well as after completion of their degree programme.
Accommodation	Although Technische Universität Berlin does not itself provide student accommodation, the "Studentenwerk Berlin" (a local non-profit agency for students affairs) offers a number of accommodation options for students enrolled at educational institutions in Berlin. Accommodation is available through the Student Services Office (http://www.studentenwerk-berlin.de) or on the private market. Rent for a single room in a student residence is approx. 400 to 500 EUR. Private accommodation can be found on the Internet at http://www.studenten-wg.de.

The internationally renowned Technische Universität Berlin (TUB) is located in Germany's capital city at the heart of Europe. The academic activities focus on achieving sharply defined goals: building a distinctive profile for our university, ensuring exceptional performance in research and teaching, providing our graduates with excellent qualifications, and a modern approach to university administration. The TUB strives to promote the dissemination of knowledge and to facilitate technological progress through adherence to the core principles of excellence and quality. Strong regional, national, and international networking with partners in science and industry are an important aspect in these endeavours.

TUB is an internationally renowned, research-intensive university dedicated to promoting science and technology for the benefit of broader society and committed to the principle of sustainability. The challenges and problems facing modern societies cannot be met on the basis of findings from individual disciplines. TUB is addressing these challenges with the aid of transdisciplinary collaborative projects. The establishment of important research partnerships in the context of the Excellence Initiative, the German Research Foundation (DFG), and the European Institute for Innovation and Technology, in addition to constantly increasing third-party funding for research projects, demonstrate the dynamic developments in this area. Prestigious science prizes and awards make these successes even more obvious. These include Alexander von Humboldt Chairs, Einstein Chairs, Gottfried Wilhelm Leibniz Prizes, and numerous grants from the European Research Council. "Research for Innovation" is a credo that TUB impressively implements. Its extraordinary profile as a technical university in association with its humanities, social sciences, planning, and economics programmes is indeed an excellent breeding ground for strong interdisciplinarity. By combining basic and applied research endeavours, and with close links to partners in science and industry, university researchers tackle societal issues and develop forward-looking solutions.

In close cooperation with EUREF AG, a new TUB campus has emerged on the property of the former Gasometer in Berlin's Schöneberg district and was inaugurated in October 2012. Four advanced Master's programmes dealing with the issue of "City and Energy" are offered here. These course offerings are fully integrated into the overall structure of the European Energy Forum (EUREF). Companies and research institutes addressing the topic of "an intelligent city for work, research, education, and living" are finding homes here. Through close cooperation between science and teaching on the one hand, and research and practical applications on the other, the EUREF Campus serves as a powerful test platform for a sustainable model city.

University location

As the capital of Germany and Germany's largest metropolis, Berlin offers unparalleled opportunities for students to enrich their extracurricular activities with culture, history, travel, and professional development. One of Europe's principal artistic centres, Berlin offers drama, musical performances, and art exhibitions, as well as world-class cultural events such as the Berlinale film festival. Historically, Berlin is a fascinating city, bearing witness to Germany's imperial period, serving as the cultural epicentre in the twenties, and being resurrected as a divided city during the Cold War. Now a vibrant symbol of German reunification, Berlin has been a focal point for European historical trends and movements.

Only a short trip from Germany's northern coastal regions, and serviced by international train and air connections, Berlin also offers excellent opportunities for inner-European travel. Berlin is most strongly influenced by the presence of the German government, but also serves as a major European financial centre. As a city that is constantly under construction, there is abundant demonstration material in sustainable and energy-efficient buildings. It also offers a range of opportunities for business and management internships, posing unique opportunities in cultural and public life that enable students to develop both personal and professional interests.
