

DAAD Thematic Network: Research on Rare Diseases and Personalised Medicine

Base: Dr von Hauner Children's Hospital LMU Munich

Academy

Research

Exchange

IDEA

We want to introduce new approaches to, and set new standards for, the education and training of junior physicians and researchers through an international dialogue.

VISION

We aim to shed light on the fundamental genetic facts and the pathophysiology of rare diseases of the immune system and to develop new treatment options as well as to induce „new ways of thinking“ in medicine. We want to help patients with rare diseases to step out of their shadowy existence as „the orphans of medicine“ and become a vanguard for a new era of personalised medicine.

ACTIONS

Short Term Research Visits
Research Stays for Junior Scientists
Lecture Series
Summer Schools
Workshops
Public Awareness Measures
