

# RISE Professional 2018

## Research Internships in Science and Engineering

### Summer Internships with German Companies - Learning by Working

There are only few scholarship programs offering a working experience abroad. In order to meet this need, DAAD (German Academic Exchange Service) has created unique opportunities for science and engineering students from the United States, Canada, Great Britain and Ireland interested in gaining serious practical, career-building experience in Germany through our RISE Professional program.

### Length of Internship

RISE Professional offers 10 weeks to 3 month internships (flexible dates, between May 15, and December 31, 2018), with a company or non-university research institution in Germany that have a strong reference to industry.

### Who can apply?

Enrolled Master and PhD students from North American, U.K. or Irish universities in the fields of biology, chemistry, computer science, physics, earth science or engineering (or a closely related field) are invited to apply. Undergraduates who are RISE Germany alumni are also eligible. Applicants must prove their enrolment at the time of the internship. Recent graduates are not eligible. German language requirements depend on the nature of the internship.

### Scholarship

All participants receive a scholarship financed by DAAD and their host company to help cover living expenses. DAAD will also provide insurance for you. Each scholarship holder will receive a lump sum of 800 Euros for travel expenses and a travel reimbursement for the trip to the three-days scholarship meeting in Heidelberg.

### Application timeframe

Internship database opens between November 1, 2017 and December 15, 2017. Do your applications during this timeframe.
